Software Developer

WORK EXPERIENCE

Full Stack Developer (freelance) - UPWORK
FEBRUARY 2022 - Till Date

Built several projects with various stacks and modern technologies.

Collaborated with several team to implement allocated features and fix bugs.

PROJECT EXPERIENCE

Eventos - Buying & Selling Event Tickets
https://eventos.onrender.com

A fullstack app developed with TDD(Test Driven Development). Frontend was built with ReactJS, Redux, SCSS and Typescript.

The backend was developed using NestJS, TypeORM and PostGRESQL as REST API and testing was done with Jest framework.

App was deployed on vercel. Git & Github was used for version control.

Quizzal - Performance Accessment App
https://quizzal.onrender.com

A fullstack dockerised service built with MERN stack. Frontend with React, Typescript and Styled Components.

Backend Restful API was built with ExpressJS, MongoDB and Mongoose.

Dockerised container was deployed on AWS ECS service and managed with dockerhub.

Lorem Gym - Gym Membership App
https://lorem-gym.onrender.com

Developed with MVC architecture using Node + Express + MySQL and Typescript.

I created views with EJS template engine, I styled with SCSS, and rendered directly from the server.

PROFILE

I am a full stack developer who's well-versed in databases, server configuration and user interface alongside implementing a seamless user experience through my diverse familiarity with modern technologies.

SKILLS

I can efficiently implement interesting user interface with JAVASCRIPT + TYPESCRIPT and its framework i.e REACTJS , VUEJS.

I'm well versed in server configuration with ability to work with NODEJS, EXPRESSJS, NESTJS and inept knowledge of core concepts like REST & GRAPHQL .

Flexibility in database with knowledge of MySQL, POSTGRESQL and MONGODB

Knowledge of modern webpage design with CSS, SASS, GSAP, TailwindCSS.

Considerable understanding of DevOps with ability in VM, Linux, AWS and other technologies like Docker, Git & GitHub.
